IN ROAD ANTENNA

Features

- Extremely Low Profile
- Different Frequencies Available:
 - Digital Cellular (**ATLC-IR-8619**)
 - Analog Cellular (**ATLC-IR-860**)
 - ISM Spread Spectrum **ATLC-IR-902**
 - Bluetooth, Wifi, ZigBee (**ATLC-IR-2400**)
- Chemical Resistant
- Waterproof
- 3 dB Gain
- Customizable Cable Length and Connector
- Suitable for High Traffic Locations
- Flush with Road Surface

Operational Description

Imagine having the ability to communicate with your equipment that is installed in a manhole in the middle of a busy street; having the ability to not have to block traffic to retrieve your data anymore. Well then ATLC Wireless In-Road Antenna (ANT-IR) is the answer.

Our in road antenna features a rugged design which allows the antenna to be mounted directly into the pavement. The IR series antenna is waterproof with a steel base to attach the antenna securely to the road surface. Construction of the antenna uses adhesives that are resistant to JP-4, acetone, methyl ethyl ketone, motor oil, and gasoline. And its rugged construction makes it virtually tamper-proof. Our standard antenna has a TNC connector on the bottom of the mounting stem that attaches easily to the supplied 12' or 20' length of LMR195 cable. Rugged, and durable; this design makes this antenna an excellent choice for your high traffic area installations

Applications

- Vendor Managed Inventory
- Interconnection weir monitoring
- Pump station monitoring
- Strain gauge studies
- Meteorological studies
